THE WHOLE OF THE MEMBERS OF THE COUNCIL.

Public Health Department,
Manor House,
Mansfield Woodhouse.

23rd November 1942.

To the Chairman & Members of the Mansfield
Woodhouse Urban District Council.

Mr. Chairman & Gentlemen,

I have the honour to present my report on the Medical circumstances of the area for the year 1941.

It follows the lines of previous War time reports, being restricted in size and scope so as to form merely a comparative record of statistics and information for present guidance and future reference.

There are two outstanding points which the statistics disclose. There are the great reduction in the cases of notifiable Infectious disease, and the increase in the deaths from Tuberculosis. While we may congratulate ourselves on the former, the second is the cause of some anxiety. They are both, however, manifestations of a tendency common to the whole Country, and not a peculiarity of the district, which has also shared in the general improvement in health.

I am, Gentlemen,

Your obedient Servant,

G.K. Thompson,
M.B., Ch.B., D.P.H.

Temporary Medical Officer of Health.

INFANT LIFE PROTECTION.

There were 5 persons on the register at the end of the year receiving children for reward.

14 visits were paid to these children during the year.

NOTIFICATION OF BIRTHS ACT, 1915.

280 births were notified during the year, the corrected number actually belonging to the district being 293.

268 births were notified by midwives and nil by doctors. 13, stillbirths were notified.

MATERNITY MORTALITY.

The arrangements for the investigation and treatment of cases of puerperal fever and for the hospital treatment of complicated maternity cases is as reported in previous reports.

SECTION C. -SANITARY CIRCUMSTANCES OF THE AREA.

WATER SUPPLY. No change has taken place in the Water Supply to the District. Quarterly samples are taken for Bacteriological examination and satisfactory reports are obtained.

The average total consumption of water per head of population for all purposes throughout the year 1941 was 23.33 gallons; for domestic purposes only 21.27 gallons. There has been a considerable increase in the consumption of water for domestic purposes during the year owing to the influx of evacuees into the District.

SEWAGE DISPOSAL. The method of sewage disposal remains unaltered and the analysis of the effluent continues to be satisfactory. Early in 1938 the work became affected by Colliery subsidence; the defects are kept under constant observation and levels are taken periodically.

No new houses were completed during the year. There are about 11 railway carriages and caravans used as dwellings in the district.

PUBLIC CLEANSING.

No alteration has taken place in the methods of collection and disposal of house refuse as reported in previous reports, but an extensive salvage scheme has been put into operation.

SECTION F. PREVALENCE OF AND CONTROL OVER

INFECTIOUS DISEASES.

The number of cases of notifiable infectious diseases showed a decrease over the preceding year; 337 cases exclusive of Tuberculosis were notified as against 646 in 1940. The high figure of notifications received during 1940 is accounted for by reason of the fact that measles and whooping cough were added to the list of notifiable diseases during the year. The means of Hospital Isolation were as in 1939.

5 cases were admitted to the sanatorium during the year for observation.

The total number of names on the Tuberculosis Register on the 31st December 1941 was 139 as compared with 149 at the corresponding period for the previous year.

19 cases were notified during the year which increases the number on the register to 158. As, however, 5 deaths occurred and 2 cases were struck off either as cured or as having left the district, the number remaining on the register is 151.

SANITARY INSPECTOR'S REPORT.

To the Chairman and Members of the Mansfield
Woodhouse Urban District Council.

Mr. Chairman and Gentlemen,

In presenting my fifth Annual Report, I regret that circumstances still require it to be set out in a much abridged and condensed form.

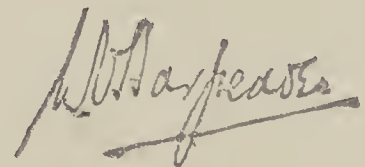

The same circumstances have also made a considerable difference to my work, reducing certain activities such as Housing work and adding new duties, viz., Food Rreatment, and Civil Defence Work.

It is becoming increasingly difficult to get repairs to property completed, and whereas Informal Notices are reduced in number, Statutory Notices have increased. This is no doubt due to the difficulty in obtaining labour and materials.

The calling up for military service of our clerical staff and the employment of temporary and unexperienced clerks has added to the difficulties of administration, but the continued interest and support of yourselves, Mr. Chairman and Gentlemen, has been much appreciated and I desire to record my thanks for same. My thanks are also due to the Officials and Staffs of the various Departments, generally for their ready help and co-operation.

I am, Mr. Chairman and Gentlemen

Your obedient Servant,

RATS AND MICE (DESTRUCTION) ACT, 1919.

During the year six complaints were received and ten visits made to premises for the purposes of abating the infestations. No National Rat Week was held, but frequent and regular visits were made to the refuse tip and other council properties and from information received about 290 rats were destroyed during the year.

SMOKE ABATEMENT.

Again no complaints were received and no action was necessary.

SHOPS ACT, 1954.

During the year 11 inspections were made of shops respecting the provisions of Section 10 of the above Act. No contraventions were observed.

CAMPING SITES.

There are no camping sites in the District.

OFFENSIVE TRADES.

No. on register at end of 1941:-

Tripe boiling.	3.
Gut scraping.)	
Fat melting.)--	1.
Blood drying.)	

OFFENSIVE TRADES (CONTINUED)

The businesses have again been carried on satisfactorily. It is pleasing to note that the improvements carried out at the Blood Drying and Fat melting factory last year have proved to be most effective, and no complaints of offensive odours have been received.

FISH FRYING.

The war has brought about a decline in the amount of business carried out in these premises, otherwise the improvements to the condition of the premises has proved to be very effective.

SLAUGHTER HOUSES.

With the exception of the slaughtering of occasional pigs for cottagers and private persons, the four slaughter houses in the District have remained out of use.

SLAUGHTER OF ANIMALS ACT, 1933.

13 persons in the district are licensed under this Act to slaughter animals.

Other Houses.	5.	-	5.

Eradication was affected by the use of Fumex Blocks and vermicidal solutions, applied by the Council's staff, and in all cases, bedding and clothing was removed to the Council's steam disinfecter and dealt with by the Council's staff.

COCKROACHES.

I am very pleased to be able to report a considerable decrease in the number of houses infested with cockroaches during the year. The total number of houses infested was six, four owned by the Council and two privately owned. The treatment carried out was as described in last year's report and was again successful.

MORTUARY.

The mortuary and post-mortem rooms continue to be a great convenience.

SCHOOLS.

A further batch of evacuees received in the District necessitated the use of a Sunday School for educational purposes. The sanitary arrangements of this school were insufficient, but were made satisfactory on informal intimation being given to the Chapel Authorities.
